

COVID-19 Site Protocol

The following **InspekTech® COVID-19 Site Protocols**¹ are for RAR™ services and products for **Exterior inspections only** and are in place in response to Government of British Columbia regulations and recommendations pertaining to the Covid-19 Pandemic.

1. InspekTech® Field Inspectors (FI) are directed to:

- Ensure they are well when visiting a dwelling.

2. While on site, our FI's are instructed to:

- Maintain 6 feet of distance between the site contact(s) at all times while performing their inspection duties.
- Use hand sanitizer before and after they have done their site work.

3. Following Site work, our FI's are directed to:

- Sanitize equipment they have used on any given site when FI considers such action needful (i.e. camera, phone and/or other electronic devices, etc.).

We have also instructed our FI's to weigh any other info they may be aware of in order that they might adhere to mutually responsible health parameters when visiting any given site.

Should you have any questions or require clarification, please contact us.

Thank you,

InspekTech® Operations
